To Whom It May Concern:

I would like to write a letter of support for Patrick Embrey, with Valley Automation computer services. Our agency is a non-profit who provides emergency shelter to women and their children, as well as services to victims of domestic and sexual violence.

Choices, Council on Domestic Violence for Page Co., Inc. has worked with Patrick, and his technicians for the past several years. We have been exceptionally pleased with all aspects of his work, including response to service calls, answering questions by me or any of our staff, and willingness to work with our budget issues.

Our agency is dependent on grant funds for most of our operating budget. This sometimes means we must wait on upgrading our system. Patrick has been very understanding and cooperative with our varying budget limitations and has done everything possible to ensure we are operating efficiently and in the most cost effective manner. He always strives to get the best prices on any equipment we purchase.

He had recommended we upgrade to the use of a server to improve the system we had. At the time we did not have the funds, but I told him we would include it in our following years budget. We had the server added this past year, and have found it has reduced many of our maintenance problems and has been an asset to our computer networking system.

Patrick and his staff have shown the utmost in professionalism and have been a great team to work with. I would highly recommend Valley Automation for any computer needs.

Sincerely,

Debbie M. Dart
Executive Director
